

## What Happens When You Cleanse Your Skin With A Microfiber Facial Cloth?

By: Nanci Callahan Nivolo

Microfiber is absolutely the best way to cleanse ANY skin type. It's a very powerful anti aging tool that promotes cell renewal through exfoliation. You use it just like you would use a wash cloth but it is no ordinary wash cloth! Plus you only need to use water. Using any type of cleanser with the Microfiber Facial Cloth actually lessens its exfoliating properties because of the "slip" they add. You'll see the difference it makes the first time you use it. You won't believe how it cleans out your pores. The Microfiber Facial Cloth removes all makeup, including the "permanent" lipstick that only oil removes! As an Aesthetician, I've never seen anything like it.

Here's what you can expect from using a Microfiber Facial Cloth:

You only need to use water which saves you money on cleansers  
Doesn't disturb PH levels in the skin - a huge benefit!  
Exfoliates so well that your skin will look like you just had a peel  
Reduces the appearance of wrinkles & lines  
Keeps skin completely flake free - no more dry skin!  
Minimizes age spots and freckles  
Keeps oily skin under control  
Diminishes acne, blackheads, whiteheads & scars  
Removes pore clogging dirt & bacteria. You have never seen such clean pores.  
Evens skin tone

How to use and care for a Microfiber Facial Cloth:

Wet the cloth with warm water and wring it out  
Use one side to completely remove ALL makeup  
Use the other side to cleanse & exfoliate your skin - it's powerful so don't scrub too hard!  
Wash it out with soap & water - hang to dry and it's ready to use again  
Do not use bleach or fabric softener  
Can be put in the washing machine and dried in the dryer
